for easy transport

The wireless PA system with rechargeable batteries is a portable self-contained PA system containing a retractable dolly, 2-5 Hr rechargeable batteries, a vibration resistant CD player, a dual-channel wireless microphone system, a built-in amplifier and a speaker. The wireless microphone system includes a handheld microphone, a belt-pack wireless transmitter, a headset microphone, and a lavalier

microphone. The built-in anti-shock CD player allows the users to play music or other sound effects for their particular applications. An AUX input connector and an AUX output connector are provided to have the unit be able to be used with any other PA or audio system. One 1/4" connector is provided to be used as *an electric guitar input* or a microphone input. The combination of the built-in amplifier and the speaker provides 120W maximum power output to achieve effective PA applications. A dust bag is provided for storing accessories and keeping the unit clean. The "All-in-one" is designed and manufactured to be a versatile, user-friendly, convenient and reliable system.
